

ELECTRICAL CONTRACT DELIVERY AT SCALE

NATIONWIDE | COMPLIANCE-LED | CONTRACT READY

A structured electrical delivery partner for
planned, multi-site and high-volume
programmes across the UK.

CAPABILITY STATEMENT | 2026

OUR CAPABILITIES

Electrical compliance, installation and infrastructure services delivered through a structured, evidence-led contract model across the UK.

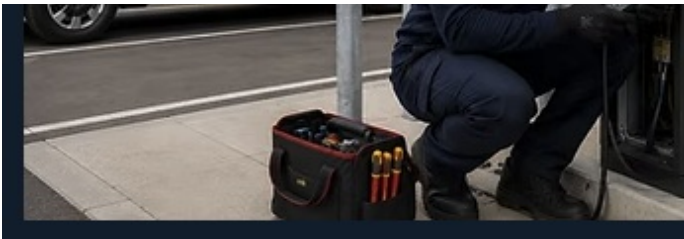

EICRs & ELECTRICAL TESTING

Planned single-phase and three-phase inspection, testing and EICR programmes for residential and commercial property portfolios, supported by structured certification, evidence capture and remedial management.

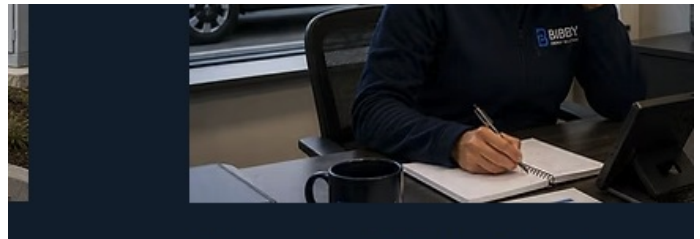

ELECTRICAL INSTALLATION & REMEDIAL WORKS

Single-phase and three-phase electrical installation, upgrades and remedial works delivered through qualified electrical teams with structured quality assurance and certification.

EV CHARGING INFRASTRUCTURE

End-to-end EV charging installation and infrastructure delivery for residential, workplace, fleet and commercial programmes, including DNO processes and associated civils where required.

PLANNED, MULTI-SITE & REACTIVE DELIVERY

Structured planned and reactive electrical delivery across multi-site property portfolios, supported by central operational management, fault attendance, compliance processes and client reporting.

ADDITIONAL ELECTRICAL CAPABILITY

Consumer unit and fuseboard upgrades and replacements | Distribution board and supply upgrades | Cable routing and associated infrastructure | Groundworks and civils where required | Reactive maintenance, fault attendance and remedial support

STRUCTURED FOR CONTRACT DELIVERY

Our operating model combines nationwide field capability with centralised scheduling, programme coordination, quality assurance and consistent client reporting.

01 NATIONWIDE COVERAGE

Electrical delivery capability across the UK.

02 CENTRALISED OPERATIONS

Programme coordination, scheduling and client communication managed through a central operational team.

03 SCALABLE FIELD DELIVERY

Qualified electrical teams deployed according to programme requirements and geographic demand.

04 CONSISTENT REPORTING

Structured job evidence, compliance documentation and programme reporting supporting multi-site visibility.

COMPLIANCE BUILT INTO EVERY JOB

Compliance is embedded into the delivery process, not treated as an afterthought. Each job follows a structured evidence, certification and notification process designed to provide clients with a clear and auditable record of completed works.

01 DNO / BUILDING REGULATIONS NOTIFICATION

Where applicable, required DNO applications, notifications or approvals are completed at the appropriate stage, alongside Building Regulations notification for applicable notifiable electrical works.

02 SAFE ISOLATION / SIP

Required safe-isolation processes and relevant SIP notifications are completed before applicable electrical works commence.

03 SITE & INSTALLATION EVIDENCE

Required photographic and video evidence is captured throughout the job to document installation, key stages of work and quality.

04 ELECTRICAL TESTING & CERTIFICATION

Electrical testing is completed and the appropriate electrical certification produced and recorded by qualified electrical personnel.

05 ONGOING QUALITY ASSURANCE

Job evidence, installation records and documentation are reviewed throughout delivery against programme, client and compliance requirements.

06 AUDITABLE COMPLETION RECORD

Photographs, videos, certificates, notifications and job records are retained to provide a structured evidence trail through to final completion.

FROM SITE ATTENDANCE TO FINAL SIGN-OFF - EVERY STAGE IS EVIDENCED.

ACCREDITED. COMPLIANT. PROCUREMENT READY.

Bibby Energy Solutions maintains the accreditations, competency standards and compliance processes required to support professional electrical contract delivery and procurement requirements.

NAPIT

Electrical competence, technical standards and compliant electrical delivery.

SAFECONTRACTOR

Supporting recognised health & safety standards and supply-chain compliance.

POWERSHIELD SIP APPROVED

Supporting authorised safe isolation of electrical supplies and compliant working practices where required.

PROCUREMENT READINESS

01 CAPABILITY STATEMENT

Overview of delivery capability, operating model and nationwide programme support.

02 ACCREDITATION EVIDENCE

Current accreditation and competency evidence available for procurement review.

03 INSURANCE DOCUMENTATION

Relevant insurance documentation for onboarding and pre-qualification.

04 HEALTH & SAFETY

Policies and supporting documentation for supply-chain assessment.

05 POLICIES & COMPLIANCE

Relevant company policies, compliance procedures and contractor documentation.

06 COMPANY INFORMATION

Company and procurement information required for onboarding, PQQ and tender processes.

SELECTED DELIVERY EXPERIENCE

Real-world delivery experience demonstrating how Bibby Energy Solutions manages electrical and EV infrastructure programmes through structured operations, compliance, quality assurance and evidence-led reporting.

FEATURED CASE STUDY

NATIONWIDE EV & ELECTRICAL INFRASTRUCTURE PROGRAMME

Client: OHME OPERATIONS

15,000+ INSTALLATIONS COMPLETED NATIONWIDE

SCOPE

Nationwide EV charge point installation and infrastructure delivery; electrical surveys and technical assessments; consumer unit / fuseboard upgrades and replacements; remedial works and supply upgrades; groundworks and associated civils where required; reactive maintenance and fault support.

DELIVERY

Qualified electrical field teams; centralised scheduling and client coordination; end-to-end job management; scalable nationwide delivery capability; structured evidence capture and centralised quality assurance.

WHO WE WORK WITH

Our delivery experience includes electrical and EV infrastructure works undertaken on behalf of organisations including:

Selected organisations for whom works have been delivered. Logos shown for identification only and do not imply endorsement or partnership.
